## SUMMARY

---

Experienced Flutter Developer with 5+ years of hands on expertise in designing, developing, and maintaining high-quality cross-platform applications for Android, iOS, and Web. Strong proficiency in Dart, Flutter Web and modern architectural patterns guided by SOLID principles, Clean Architecture, and the BLoC pattern, ensuring scalable, maintainable, and testable codebase with comprehensive unit and widget testing.

Proven track record in building and delivering production-grade product applications, including e-commerce platforms, with deep experience integrating Firebase services, GraphQL APIs, and complex business logic. Well-versed in Git-based version control and the complete deployment process for Google Play Store, -Apple App Store.

Adept at implementing smooth animations, responsive layouts and UX-focused interfaces, leveraging Material 3 design principles to enhance user engagement and performance across platforms.

Highly collaborative team player with experience working in agile environments, effectively using Jira, Microsoft Teams, Cursor, and Antigravity to communicate, plan, and deliver features on schedule.

Passionate about clean code, continuous improvement, and translating product requirements into elegant technical solutions.

Additionally, possess basic working knowledge of JavaScript, Python, and MongoDB enabling effective collaboration across full-stack environments and better integration with backend systems.

## EDUCATION

---

- **PARUL UNIVERSITY**  
Vadodara, Gujarat, India  
2016 - 2020

## LANGUAGES

---

- **ENGLISH**
- **HINDI**
- **GUJARATI**

# SKILLS

---

## PROGRAMMING LANGUAGES

- Dart
- Python
- JavaScript

## APP DEVELOPMENT & FRAMEWORKS

- Flutter

## ARCHITECTURE & DESIGN PATTERNS

- MVVM
- Clean Architecture

## BACKEND & CLOUD SERVICES

- Firebase

## DATABASES

- MongoDB
- MySQL

## TESTING

- Unit Testing / Widget Testing

## VERSION CONTROL

- Git
- Bitbucket
- GitLab
- Azure

## PROJECT MANAGEMENT & METHODOLOGIES

- Agile Methodology
- Jira
- Basecamp
- Microsoft Teams

## AI TOOLS / MCP

- Cursor
- Claude Code
- Antigravity
- Dart MCP

# CERTIFICATES / EVENTS

---

- PRIDE OF THE MONTH AT INDIANIC INFOTECH LTD.
- FLUTTER FORWARD EXTENDED AT AHMEDABAD
- GOOGLE DEVELOPERS GROUP DEVFEST 2022
- FLUTTER CRASH COURSE BY ANGELA YU UDEMY

# WORK EXPERIENCE

---

- **INDIANIC INFOTECH LTD - FLUTTER DEVELOPER**

Ahmedabad, India | 02/2022 - Current

### TopSpin Valet (Enterprise) :-

Developed an administrative companion application for the TopSpin Club platform to streamline operations and manage user activities.

Enabled club managers to monitor event inquiries, track requests, and take necessary actions efficiently. Designed functionality for valet staff to accept or reject car parking requests and access relevant user details, improving operational workflow and user experience.

**TopSpin Club :-**

Led the development of a product-based indoor sports, gym booking, and social community application, available on both the Google Play Store and the Apple App Store. Served as Team Lead, overseeing architecture decisions, feature planning, and collaborative development to deliver a scalable, production-ready platform. Implemented a rich set of features including a social timeline feed, QR-based activity door scanning for entry and exit tracking, friend invitations for booked activities, and a club cash wallet system supporting earning, redemption, and peer-to-peer transfers. Developed match scoring, event management (admin-driven), and valet parking requests for enhanced on-site user experience. Integrated Razorpay payment gateway to support multiple membership models such as individual, family, and group memberships, with functionality to add family members under shared plans. Leveraged Firebase Dynamic Links to deliver targeted promotional campaigns, membership offers, and event updates. Enabled real-time chat and push notifications to improve user engagement and communication.

**My Exp - Exp Realty, USA :-**

Contributed as a Software Developer to My Exp, a product-based real estate application for USA agents, currently live on Android, iOS, and Web platforms. Collaborated in a 20+ member team to implement scalable and maintainable solutions using Clean Architecture, ensuring consistent performance and responsiveness across devices. Implemented core features including RESTful API integration, state management with BLoC, responsive web design, Okta authentication, and local data storage using SQLite, contributing to a robust, production-ready real estate platform.

**i-Trials, USA :-**

Patient App is an all-in-one healthcare platform designed to simplify patient care and communication. It allows patients to easily book and manage medical appointments with their healthcare providers. Users can record daily health checkups and track their medication doses to stay on top of their treatment plans. The app supports secure Zoom-based video consultations with doctors and medical staff for convenient virtual care. Patients can also arrange transportation to medical appointments using Uber Health. A built-in chat feature enables secure communication with healthcare professionals whenever needed. The app also offers gift rewards through Tremendous to encourage patient engagement and allows users to manage their personal profile, medical information and preferences from a single, easy-to-use platform.

**Dart MCP Server :-**

Developed a Dart-based Model Context Protocol (MCP) Server with a local development setup to support analytics workflows and AI-powered tool integration. Implemented multiple analytics tools for data retrieval, processing and reporting through standardized MCP interfaces. Designed a modular and extensible architecture, enabling seamless communication between AI clients and local services. Optimized request handling, asynchronous operations and error management to ensure reliable performance during development and testing. Configured the local environment for efficient debugging, rapid iteration and integration of multiple analytics tools.

- **MOON TECHNOLOGIES - JR ANDROID + FLUTTER DEVELOPER**

Ahmedabad, India | 01/2021 - 12/2021

**My Portfolio :-**

Designed and developed a responsive web and mobile portfolio application using Flutter to practice and demonstrate adaptive UI principles across multiple screen sizes.

**Moon Dialer :-**

Developed a product-based VOIP calling application for Android and Web platforms using Flutter.

Enabled users to make in-app voice calls to other registered users through Twilio Voice SDK integration.

Implemented advanced contact management features, including import/export of device contacts, call scheduling, and contact campaign creation for bulk and planned outreach. Built and maintained core product functionalities such as call recordings, call logs, and subscription-based membership purchases integrated with a secure payment gateway. Focused on performance, scalability, and user experience while delivering a reliable, production-ready communication solution.
